

AI Basics for Schools

Massive Open Online Course

Artificial Intelligence (AI) is gaining importance in our lives, yet little about it is taught in schools. Through this three-module course, participants will:

- » Explore the basic elements of AI
- » Learn how to define it
- » Discover ways it is already used and
- » Explore the opportunities and challenges for teaching and learning

They will discover AI-related activities that can easily be implemented in different learning environments: fully online, hybrid/blended and a physically distanced classroom. They will finally examine ethical issues behind artificial intelligence and learn how to help their students unlock the potential of AI.

Key Info:

Target audience: primary and secondary school teachers, anyone interested in the topic

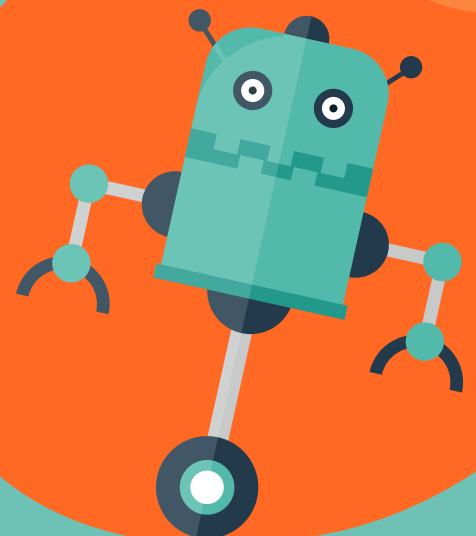

Start date: 8 March 2021

End date: 7 April 2021

Weekly commitment: 4-5 hours

Language: English
